Sang-Uk Han, MD, PhD

Director, Ajou University Hospital

Professor, Division of Gastrointestinal Surgery, Department of Surgery, School of Medicine, Ajou University, Suwon, Korea

Dr. Han graduated from Seoul National University in 1988 and received the PhD degree from same university in 2000. Dr. Han works as a Surgical Oncologist at Ajou University Hospital with research interest in cancer treatment. As a surgeon, he specialized in minimally invasive surgery of gastric cancer. He has performed more than 4000 gastric cancer surgeries; including laparoscopic gastrectomy, robotic gastrectomy, and open gastrectomy, with bariatric surgery and anti-reflux surgery in selected patients. He developed many novel technique for laparoscopic or robotic gastrectomy. As a clinical researcher, he has been active in the conduct of clinical trials at Phase I, II and III levels. He is the Principal Investigator of investigator-initiated, multicenter trial of gastric cancer (KLASS-02 study: Feasibility of laparoscopic gastrectomy with D2 dissection).
